## PROFILE

Accomplished Full Stack Developer with a strong foundation in React, Node.js, Firebase, and MongoDB. Recognized for creating dynamic, visually appealing user interfaces and delivering exceptional user experiences. I have completed my Bachelor of Science in Information Technology, I am committed to expanding my development skills and theoretical knowledge to achieve well-rounded expertise in the ever-evolving tech landscape. Key achievements include developing the Code Crafters platform and the Chatties chat web app.

## PROJECTS

### 1. Code Crafters (Final Year Project)

**Technologies:** React, Firebase, Node.js

**Role:** Full Stack Developer

**Responsibilities:** Developed responsive UI using React, managed backend services with Node.js, integrated Firebase for real-time database management.

**Achievements:** Successfully implemented real-time data synchronization, resolved complex state management issues, and optimized backend performance.

### 2. Chatties (Chatting Web Application)

**Technologies:** React, Firebase, Node.js

**Role:** Full Stack Developer

**Responsibilities:** Developed intuitive UI using React, managed backend services with Node.js, integrated Firebase for real-time communication.

**Achievements:** Improved real-time app development, enhanced user authentication, and refined UI/UX design.
